Suggestions of equipment etc. you may want to acquire for your country living – outpost centre venture.

SOLAR ePOWER PLUS: Standby power generator: Worked as advertised. Holds charge well and solar panels work well in charging the battery while the equipment is in use. **Very quiet.** This equipment is designed to **add panels and battery** to increase power availability – output if desired. *Advt. for outdoor use – but there's a warning to **keep it dry.** Not waterproofed.*

NOTE: We should try to recycle - reuse - repurpose and or build our own stuff as much as or whenever possible. Doing so can result in a stronger better and even more functional - suitable product and will most likely be inexpensive compared to commercially available stuff. | It's also advisable to seek for items from more than one source and, where possible purchase comparable locally available stuff. **Consideration should also be given to establish a good herb garden early into the transition process. As a part of what Proverbs 24:27 advises.**

Radio with NOAA Weather channels. Can be used as a speaker (it's at least 4 times louder than the laptop sound for music, videos, etc.), has a built in rechargeable battery; hand crank for power and also has a solar panel at the top of the handle, that works pretty well and, doesn't even need to be in direct sunlight - it starts charging immediately (flashing—battery charging indicator) and a “reading light” – plus flashing red light; input for headphone, an AC charging port; a full function clock; a USB port for charging your phone. Convenient buttons at front to silence and restart sound. Etc. Never had a problem with this sturdy, reliable piece of good thing to have for the country life!!
